Jennifer Sept. 28, 2012
Thought I should report how my day went yesterday attempting web ex.
My Apple computer only shows a picture of the agenda. Is that what it is suppose to do? Am
I lacking a piece of equipment to participate by
web ex? I phoned your staff, but they did not have web ex knowledge.
So I listened by phone from 9 30- 4:30.

Just to let you know, sound on the phone was scratchy at times.
Sometimes muted. Volumn was so low at times that it was impossible to understand. Audio
staff needs to be checking that they are doing their
job. Many of the speakers did not identify themselves, so it was a
challenge to follow who they were or worked for, especially if the conversation exchanged
between a few speakers.

Thought you would like to know how it was from our end. Doing my best to stay involved.
